

AUSTRALIAN TANKS PROJECT CASE STUDY

Client: Hutchinsons Builders
Project: Stormwater Detention
Location: Toowoomba, Qld

THE CHALLENGE

By urgent request, Australian Tanks were appointed to provide an underground, trafficable detention system and to have the system fully installed within a 24 hour period.

THE SOLUTION

- » Three (3) x precast 7000L tanks provided as an inter-connectable stormwater detention system
- » Installed in just one (1) hour and fifteen (15) minutes

THE RESULT

- » Arrival onsite at 12:05pm
- » Fully installed by 1:20pm with a two-man crew
- » Trafficable by a fully loaded semi-trailer
- » Onsite efficiencies and project savings

PRODUCTS

- » Australian Tanks 7000L (x 3) inter-connectable precast tanks
- » All penetrations, risers and access frames
- » All sealant supplied for installation
- » T44 traffic rated
